Live Class Addon

Academy LMS
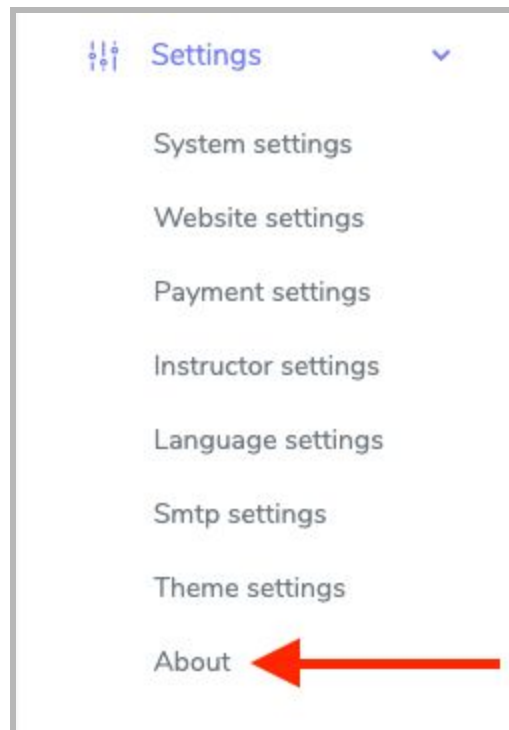

User Guide

Addon Installation:

Please follow the below steps to complete the installation process of Certificate Addon.

1. Before starting the installation process, we would suggest you to check your application version. It has to be the latest one. For checking the application you can move to **About** section from **Settings** menu.

2. If you are running the latest version, You are now good to go.
3. First download the addon you want to install on your application from Codecanyon
4. Unzip the downloaded file.
5. You should get Two folders inside. One is for documentation and the other is for the addon file.
6. You do not need to change anything. Like renaming, removing or something else.
7. Now get back to your application. Login as Admin role. After logging in you will be able to keep following.

8. From the left navigation menu, Go to **Addon Manager** from **Addon** section.
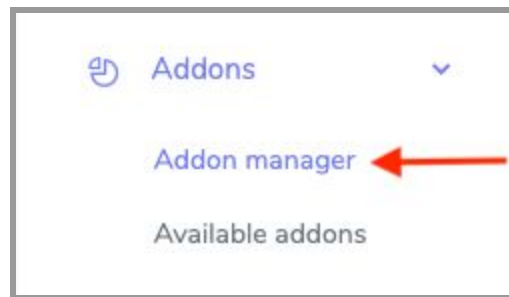

9. You will find a list of addons you have so far.
10. Click on the "**Add New Addon**" button on the top. You should redirect to an upload addon view.
11. That view will contain a single field called "**Upload Addons File**". Just upload the "**certificate.zip**" file.
12. After that hit the "**Install Addon**" button.
13. You should get a success message notification and you can also see your installed addon on the "**Installed Addon**" list below.

Addon Usage:
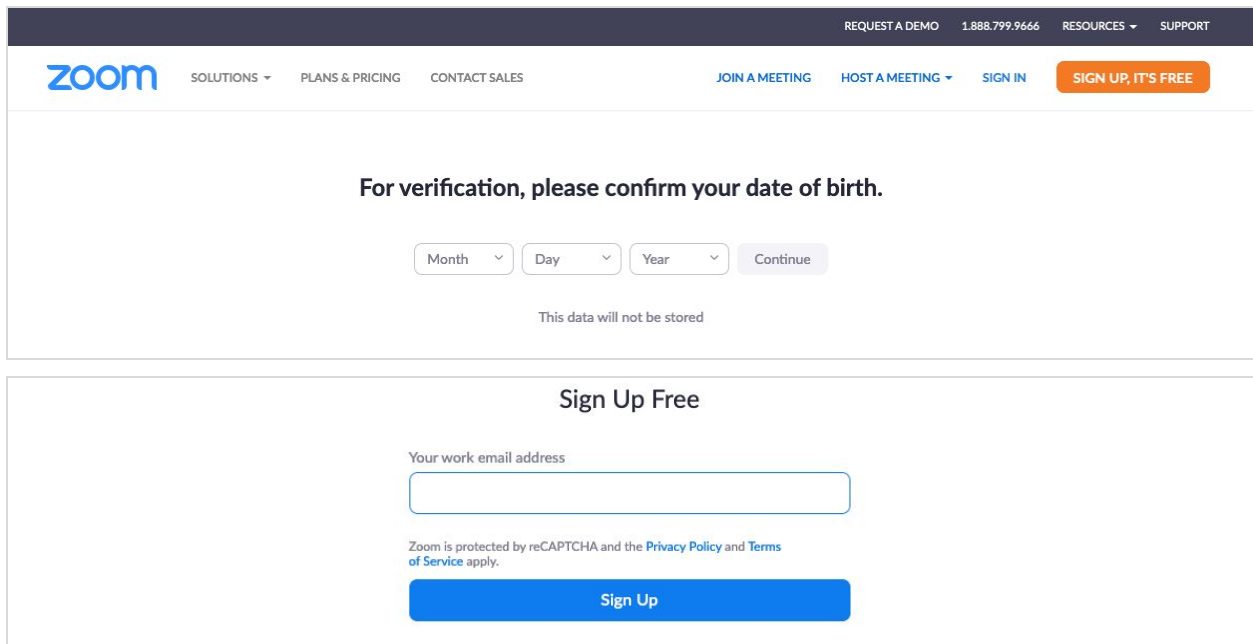

To start live class using zoom app, follow these steps described below:

1. Zoom account setup
2. Obtain API keys
3. Connect academy LMS with your zoom account
4. Create zoom meeting
5. Configure course live class schedule
6. Operate live video class
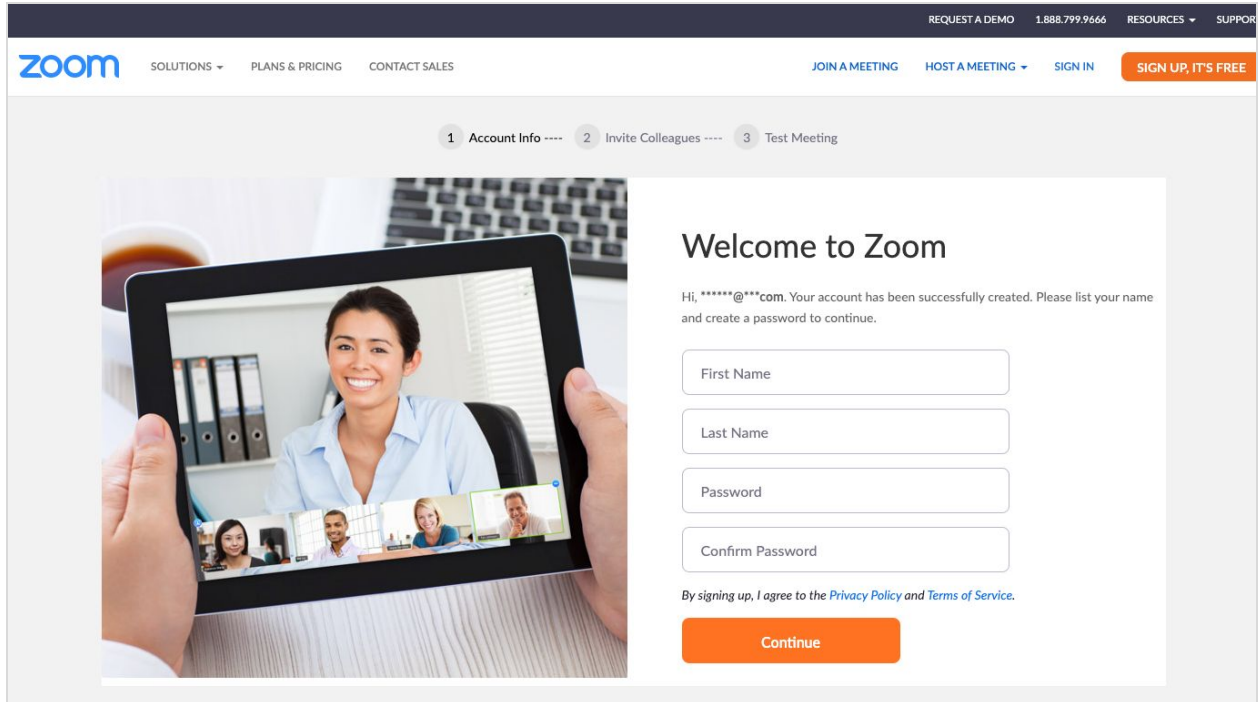

1) Zoom account setup

Create your zoom account following this link:
https://zoom.us/signup

Fill up the form with given instruction and complete account creation by verifying your email address.

Finally go to your account page and complete the account signup process.

If you already have a zoom account, just ignore this step and login to your zoom account.

2) Obtain API keys

In this step, you have to create a new JWT app to generate your API keys.
To do this, navigate to the link below and accept the terms of service:
https://marketplace.zoom.us/develop/create

Now select JWT and press "Create"

Give it a name and create the app.
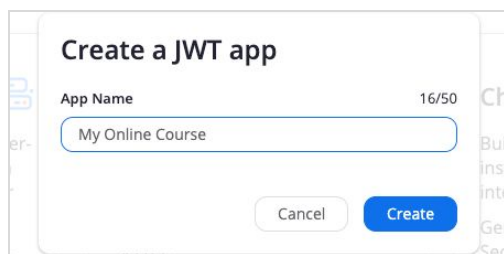

Now fill up the app information form as instructed and then click "Continue":

My Online Course

Intent to publish: No   Account-level app   JWT Credentials

Basic Information

App Name   16/50   Short Description

My Online Course   Short description

Company Name

Your Lms Company

Developer Contact Information

Name

John Doe

Email Address

UPLOAD

● Information
✓ App Credentials
● Feature
✓ Activation

✓ Saved   Continue

Skip the next steps and go to "Activation". You will see the confirmation screen of your app creation.

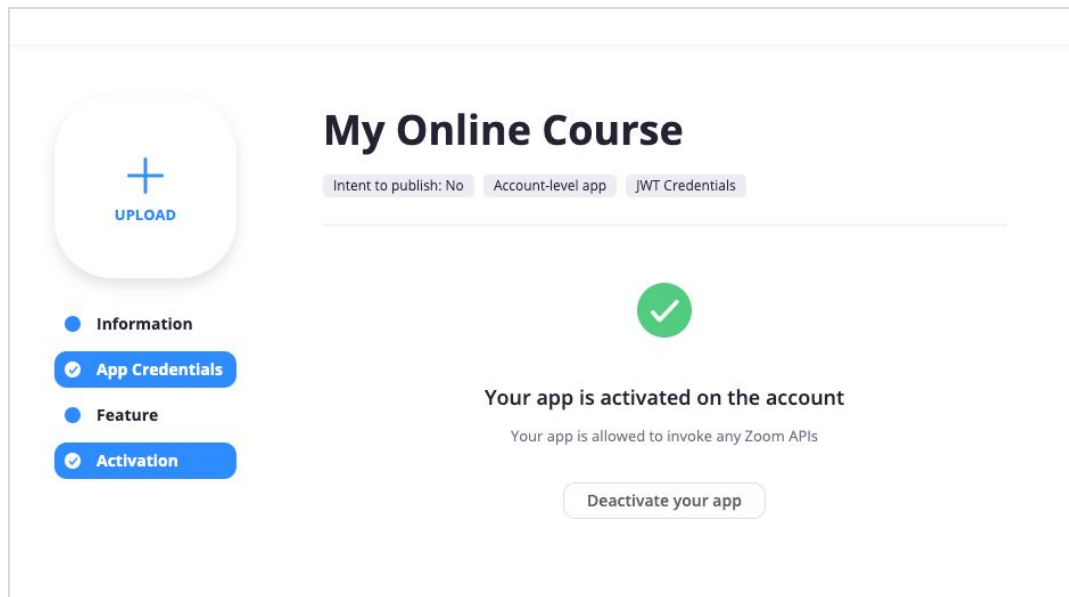

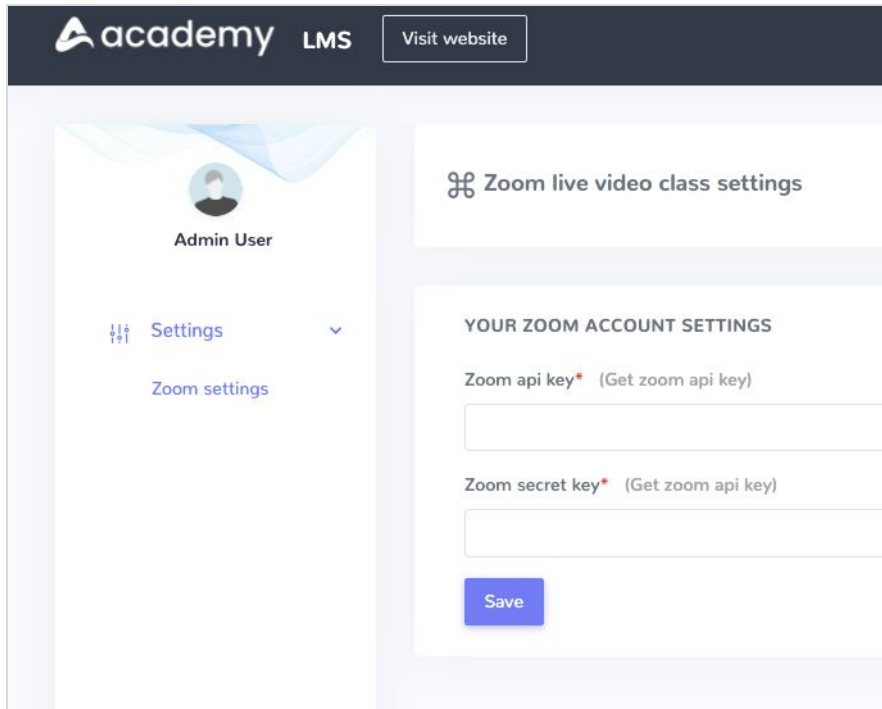

Now come back to "App credentials" tab.

Here you will get the API key and the Secret key, those will be required in the next step.

3) Connect academy LMS with your zoom account

Open your academy LMS application zoom settings:

Copy the API key and Secret key you got from the previous step and save it in this form. Once you have configured them correctly, your Academy LMS portal is now connected with your zoom account.

4) Create zoom meeting

You can create a zoom meeting in any of the following ways:

1. Browser (in zoom website)
2. Desktop app (Windows, Mac, Linux)
3. Mobile app (iOS, Android)

In any medium, after the creation of the zoom meeting, retrieve the meetings id, password.

If you do NOT have the Zoom app installed, go to zoom.us and select "Host a Meeting" to start the installation. If you DO have the App installed, see below -
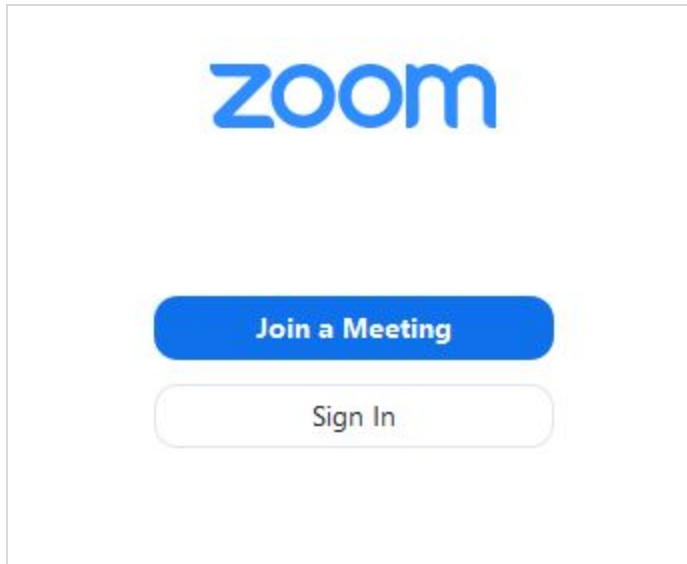

Open your Zoom app on your desktop and click Sign In.

Log in using the E-mail and password that you have created, or with Google(Gmail), Facebook, or log in with SSO.
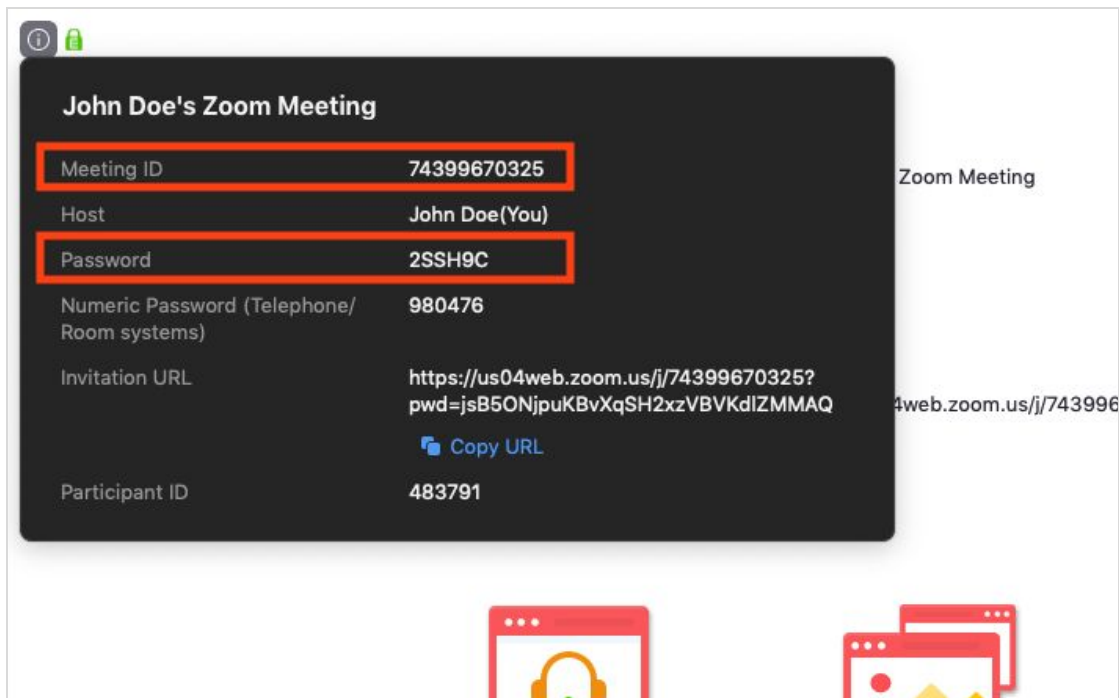

Click the downward arrow and select Start with video, then click New Meeting to start an instant meeting.
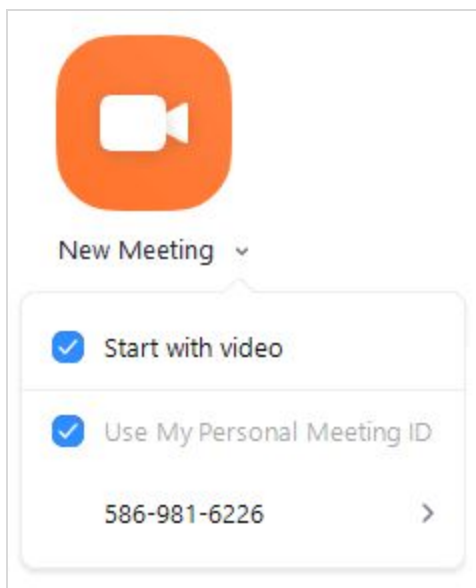

Locating the Meeting ID, password during a meeting:

PC or Mac

The Meeting information, including the Meeting ID, Password can be viewed by clicking the info button in the top corner of the meeting window:

iPhone or android

The Meeting information, including the Meeting ID, Password can be viewed at the top bar of the meeting :

support.zoom.us/hc/en-us/articles/201362613
support.zoom.us/hc/en-us/articles/201362373

5) Configure course live class schedule

The course you have set the live class for, go to the settings of that course.
Navigate to the leftmost tab "Live class".
Enter your planned schedule (date and time both) and note to students about the class.
Now copy the zoom meeting id, the password you got from the previous step and enter those values in this form and update the course.

The live class schedule and note you have saved will be shown to course students from their course playing page.

6) Operate live video class

Once you have completed all those previous steps, you are now ready to start your live class. You need to start the meeting from your zoom app before the schedule is announced to your students.

In the course playing page, a student will be able to join the live class by clicking the "join live video class" button

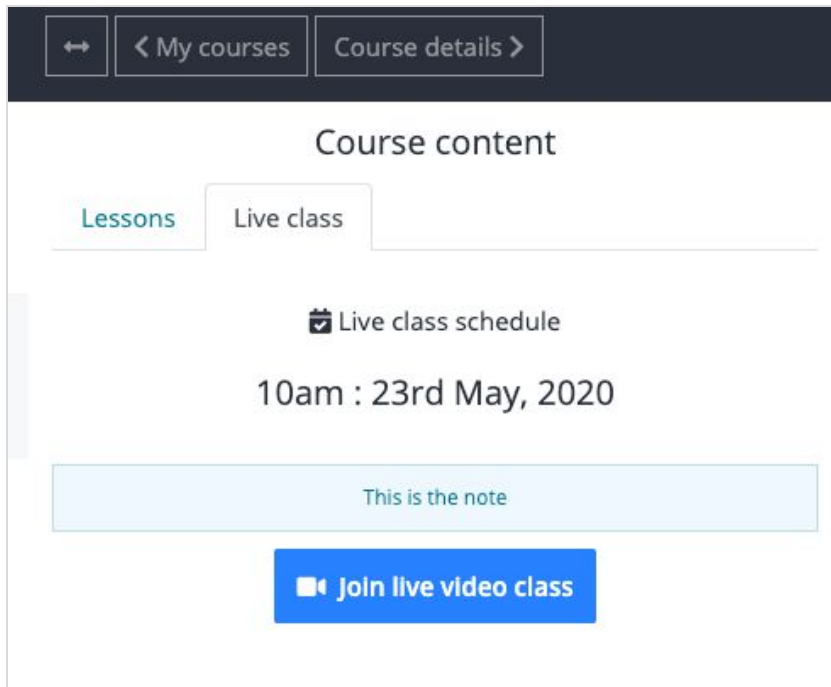

If any student attempts to join the class, but you (as the instructor) didn't start the zoom meeting yet, the student will see this warning message:
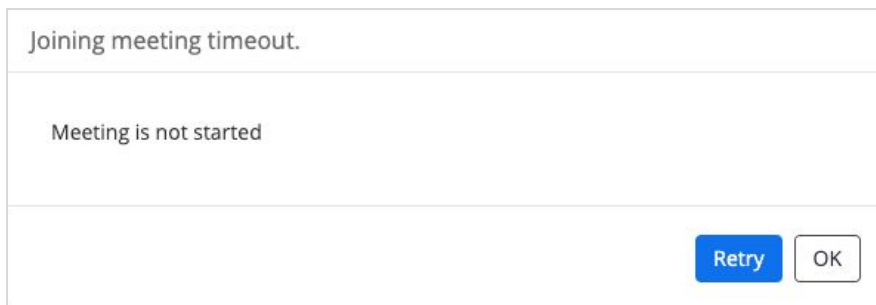

If you (as the instructor) have already started the zoom meeting and a student attempts to join the live class, the student will be waiting for your joining approval.
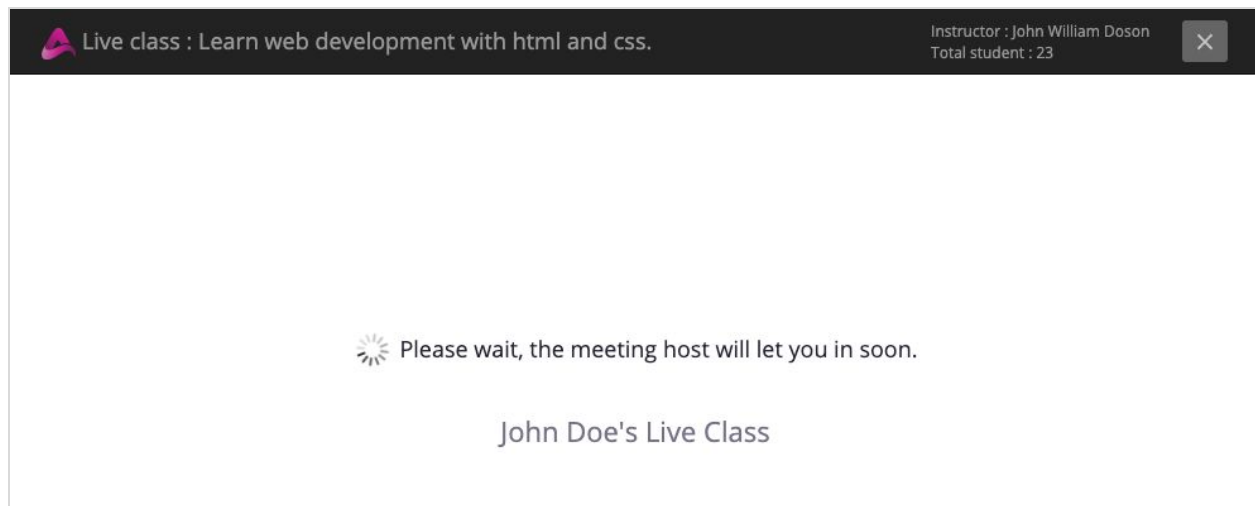

Now in your zoom app's waiting room or participant list, you will see your student is awaiting your confirmation.
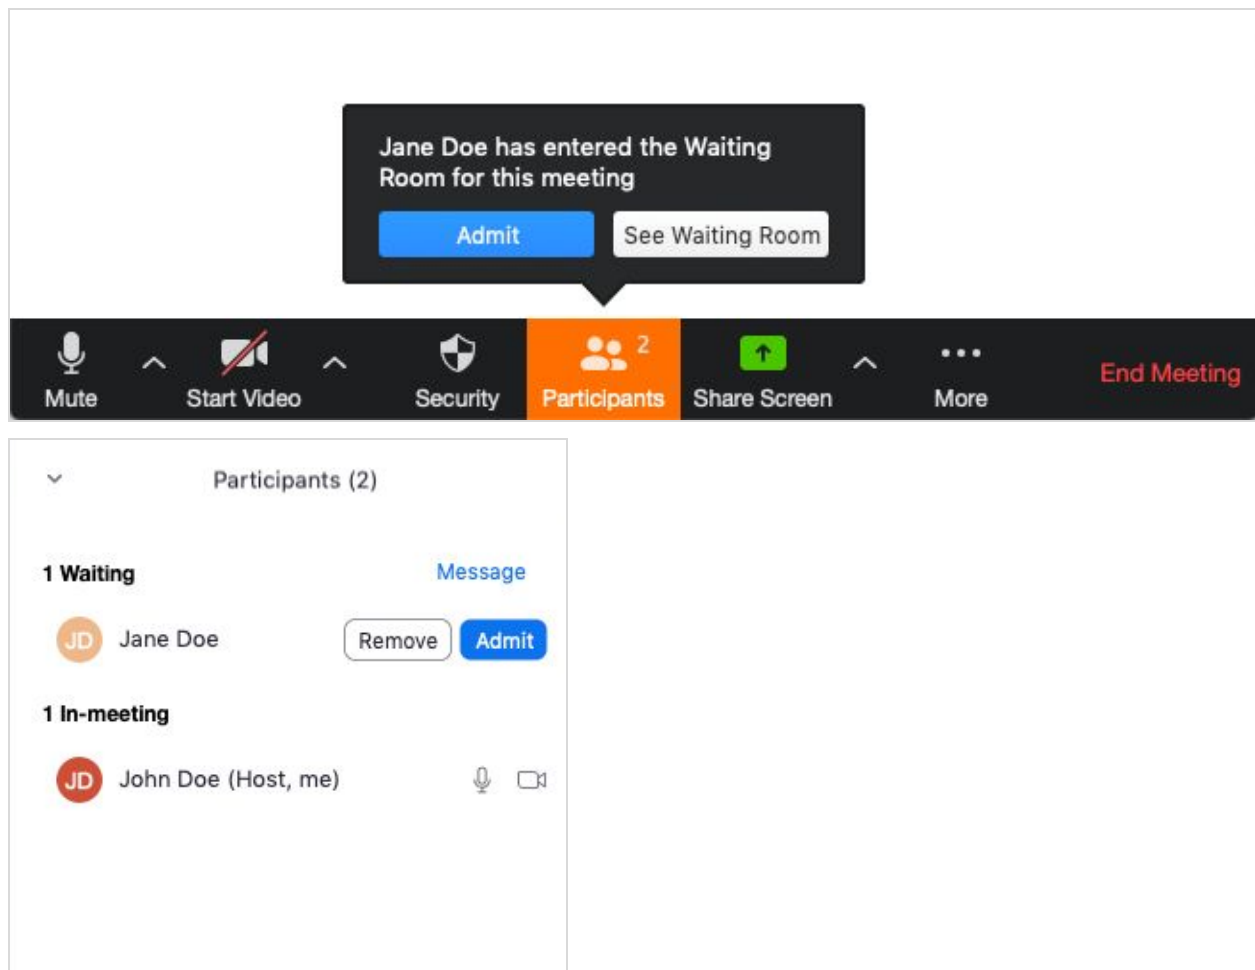

You need to "Admit" the student to enter him/her to your live class.
A summary of the course information is shown to the live class student side top header. It includes course name, instructor name, total number of students enrolled in this course.
